- 10:30 – Migrating to Fedora Directory Server (FDS) by Del Elson
- 11:30 – State of the kernel in Fedora 9 by Dave Jones
- 13:30 – Writing SystemTap scripts by Eugene Teo
- 14:30 – Samba + LDAP using FDS by Del Elson
- 15:40 – Fedora I18n Project by Jens Petersen
- 16:40 – Provisioning Red Hat/Fedora systems using custom builds and kickstart by Richard Keech

netconf presentation “plug”

- netconf aims to be a cross-distro effort to bring network configuration up to speed
- **Thu, 31 Jan, 3:40pm, venue “Old Arts E”**
- Everyone welcome, in particular:
 - developers interested in network configuration or cross-distro standardization
 - users with network experience
 - (Python) coders looking to join a cool project
- <http://netconf.alioth.debian.org>
